

Export Compliance Policy

MITEQ is firmly committed to adhering to all export control laws and regulations promulgated and administered by agencies of the United States Government. Under no circumstances will sales be made contrary to U.S. Export Regulations. MITEQ uses an Internet assessable export compliance program entitled "Visual Compliance On Line". This service provides up to date access to current export regulations and Restricted Party Screening. A search conducted from within this service will disclose if a firm and/or individual that MITEQ is considering selling to is excluded or restricted from receiving U.S. origin items or technology. No transactions will be accepted from individuals or firms that show up during the restricted party screening.
